

Gamestation

intralot

The full self-service lottery solution

The **GameStation** is ergonomically designed with two 23-inch full high-definition displays and LED cabinet illumination, enhancing the gaming experience and improving the performance of existing games.

The **GameStation's** autonomous functionality allows it to act as an advanced stand-alone playpoint that minimizes counter queues and enables retailer staff to concentrate on speedier customer support and other duties, thus increasing customer satisfaction.
