GAMING LICENSING SYSTEM

A sophisticated workflow-based solution

GLS is an integrated platform for the Gaming Regulator, offering end-to-end processing and workflow management for all Gaming Licensing processes. It features a user-friendly online access to all gaming sector stakeholders for paperless submission and processing of licenses (e-Licensing) and instant electronic payment of licensing fees.

GLS also provides optimized workflows for regulatory Gaming Compliance audits and investigations, including remote online access by the Regulator's mobile Compliance teams.

Key benefits for the Regulator

GLS is an invaluable tool for the Regulators, as it offers a single, end-to-end view of the gaming sector in a jurisdiction.

More specifically, it enables:

- ▶ Efficient, often automated, online and paperless licensing with rules-based processing (e-Licensing)
- ▶ Increased capability for regulatory activities across all forms of gaming, through complete information integration and management
- ▶ Improved reporting and end-to-end view of monetary flows and e-payments
- ▶ Drastically reduced operational costs

Key benefits for Gaming Sector stakeholders

GLS also offers an essential solution and a set of advantages for the external stakeholders:

- ▶ Self-service capability for licensed gaming operators, gaming venues, manufacturers and 3rd parties
- ▶ Short license approval times
- ▶ Up-to-date and detailed information on the progress of license approvals
- ▶ Comprehensive online information system, with the relevant licensing data and accounting information
- ▶ Interfacing capability for integration with own systems
