

**Gamekiosk**

**intralot**

# An all-in-one self-service terminal solution

The **GameKiosk** is a powerful and flexible touchscreen terminal. Its minimal bodywork can be placed in any retail store, even where space is limited. It hosts an array of advanced features and options and it can be efficiently used for serving both registered and unregistered players.

The **GameKiosk** is an easy-to-play, self-service terminal, cleverly designed to offer a thrilling player experience and information services, through its impressive single or dual screen, full high-definition 21.5" displays. Perfectly combining computing power with low power consumption, it delivers betting and lottery games along with game information and advertising.

- ▶ Single or dual 21.5" full high-definition displays / touchscreen
