Source: Fitch

Fitch Ratings' Stable Outlook for Intralot S.A (Intralot)'s 'B+' IDR reflects our belief that the underlying business model and financial trends appear to have stabilised, underpinned by steady recurring contracted revenues and cash-flow generation. We also view management's attempts to rebalance the portfolio over the past year positively.

Despite the improvement seen in FY16 Intralot's high gross leverage remains not fully aligned with a 'B+' rating, but the business profile is commensurate with a 'BB' rating category for the sector. The solid business risk profile together with a weaker financial profile supports Intralot's IDR at 'B+'. In its assessment Fitch estimates that Intralot will maintain a conservative financial structure. Any evidence of a deteriorating operating environment, contracts not renewing or renewing on worse terms, unexpected cash leakages, or weakening of liquidity will be negative for the rating.

Key Rating Drivers

Recurring Contracted Revenue Base: Intralot's credit profile benefits from more than 85% of revenues recurring and contracted up until 2021, with only three contracts up for renewal in 2018. The fall in EBITDA margin appears to have stabilised, and we expect this to improve to 13.7% in 2017. However, we expect many of the contracts to be renewed due to high switching costs, although we continue to believe these could be on lower margins in future and may require a higher renewal fee. EBIT margins are now above the minimum threshold of 7%, supporting the 'B+' rating.

Weak Free Cash Flow: We expect free cash flow (FCF) to be negative in 2017 and 2018, bottoming at -1.8% in 2018 due to one-off investments and some renewal fees and then to turn positive thereafter. FCF can be volatile as a result of upfront investments related to new contracts of contract renewals; however, this does contribute to a steady operating cash-flow generation due to its recurring profit stream as a key credit support.

Leverage Down from 2015 Peak: Fitch expects funds from operations (FFO) adjusted gross leverage to remain high at about 6.0x in 2017 and 2018. Our base-case projections do not factor in any proceeds from the sale of Oceania. This level of gross leverage is not commensurate with a 'B+' rating which indicates low financial headroom. However, FFO adjusted net leverage remains within our sensitivity guidance for the rating below 4.5x. We anticipate some deleveraging from the group's underlying operating performance, but the potential sale of Oceania or other assets could still be used to accelerate the debt reduction process.

Reputable Gaming Operator, Technology Supplier: Intralot has established itself in the international gaming sector as a reputable provider of products such as systems to manage lotteries through software platforms and hardware terminals; and in betting, a large algorithm-based sportsbook. This has enabled it to win important contracts for the supply of technology and the management of lotteries in the US and Greece and for sports betting in Turkey and Germany.

Positive Scope for Growth: The gradual liberalisation of gaming markets, governments' keenness on finding ways to raise tax proceeds and the increasing supply of new games, should all provide increasing opportunities for Intralot. The company should be able to leverage on its experience and reputation and also benefit from the limited number of reputable suppliers in the industry, allowing the group to expand into new geographies. Intralot is also well positioned to benefit from opportunities in the US.

Limited Linkage with Greece: Intralot generates only less than 10% of its EBITDA in Greece (rated 'CCC' with a country ceiling of 'B-'). We view Greece's low sovereign rating as neutral for Intralot's ratings, given its contractual requirement to maintain large portions of its cash outside Greek banks. In the event of a sovereign default, including Greece's exit from the euro – a scenario that we do not currently envisage – the company has contingency plans in place that it could complete within three months. Intralot's wide geographic diversification of its business and lack of meaningful reliance on Greek banks for funding mitigates its exposure to Greece and other countries with a 'b' economic environment.

Above-Average Recovery Expectations: Our recovery analysis assumes that Intralot would be considered a going concern in bankruptcy and that the company would be reorganized rather than liquidated. We have assumed a 10% administrative claim.

Intralot's going concern EBITDA is based on 2016 EBITDA of EUR108 million (after deducting attributable EBITDA to minority interests). We apply a 25% discount to arrive at an estimated going concern post-restructuring EBITDA available to creditors of EUR81m. We then apply a conservative distressed enterprise value EV/EBITDA multiple of 4.5x to Intralot's wholly owned operations resulting in an EV of EUR364.5 million.

We then estimate an additional EV of EUR102m of additional value stemming from minority interest, mainly from emerging markets. This is calculated as EUR68 million of attributable EBITDA discounted by 50% with a conservative distressed enterprise value EV/EBITDA multiple of 3.0x.

In terms of distribution of value, all unsecured debt would recover 58% in the event of default consistent with an 'RR3' and an instrument rating of 'BB-', one notch above the assigned IDR.

Rating Derivation Relative to Peers

Rating Derivation versus Peers	
Peer Comparison	Intralot is positioned well in the 'B' rating category, the main differentiating factor being its visibility of revenue from recurring contracted EBITDA. Intralot has smaller revenue and EBITDA than Ladbrokes (BB/Stable), William Hill, IGT and Scientific Games (b-*/positive). However, it does have broad geographic diversification and benefits from the more profitable emerging markets. It also has an established position in the US, and is well placed for potential growth opportunities. Intralot displays unique, stronger characteristics than its peers in the 'B' rating level, with contracted EBITDA and specialist supplier-technology expertise.
Parent/Subsidiary Linkage	No Parent/Subsidiary Linkage is applicable.
Country Ceiling	No Country Ceiling constraint was in effect for these ratings as Intralot only generates less than 10% of its EBITDA in Greece (where the country ceiling is B-).
Operating Environment	No Operating Environment influence was in effect for these ratings due to geographically diversified business operations.
Other Factors	n.a.

Rating Sensitivities

Future Developments That May, Individually or Collectively, Lead to Positive Rating Action

- Revenue growth and steady profitability supported by a stronger return on capital on existing and future contracts with limited capex outlays
- FFO adjusted net leverage reducing sustainably below 3.0x (or FFO gross lease-adjusted leverage below 4.0x), with cash deposited predominantly at investment grade-rated counterparties
- FFO fixed-charge cover above 3.0x, unaided by favourable interest carry
- Evidence of sustained positive FCF generation in the- low to mid-single digits of sales.

Future Developments That May, Individually or Collectively, Lead to Negative Rating Action

- Evidence that new contracts or renewals are occurring at materially less favourable conditions for Intralot, resulting in continuing weak EBIT margins of under 7%, large upfront concession fees or capex outlays (2016: 8.2%)
- FFO adjusted net leverage sustainably above 4.5x (or FFO adjusted gross leverage above 5.5x) (FY16: 4.3x and 5.6x, respectively)
- FFO fixed-charge cover below 2.0x (2016: 1.8x)
- Material reduction in liquidity without a commensurate reduction in gross debt levels

Liquidity and Debt Structure

Comfortable Liquidity Following Refinancing: At end-2016, Intralot had EUR164 million of cash on its balance sheet, of which about 7% was deposited in Greek banks, and around EUR65 million of undrawn availability under committed facilities. This was sufficient for liquidity purposes, with no significant debt maturity until 2019 when the term facilities mature, while the two bonds (totalling EUR500 million) mature in 2021. At the start of 2017, Intralot drew EUR15 million under its RCF with respect to the new Amelco partnership.

In response to the Greek debt crisis and to protect its liquidity position, Intralot fully drew on its syndicated revolving credit facility (RCF; EUR120 million of EUR200 million facility) maturing May 2017. This was replaced by a new EUR225 million syndicated facility maturing in 2019 (RCF EUR86 million, term loan EUR99 million and standby RCF EUR40 million) following the successful placement of the EUR250 million unsecured notes in September 2016 which extended maturities.

Definitions

FFO Margin: FFO divided by Revenues.

FCF Margin: FCF divided by Revenues.

FFO Adjusted Net Leverage: Total Debt with Equity Credit + Lease equivalent Debt + Other off Balance Sheet Debt - Readily Available Cash & Equivalents divided by Funds From Operations [FFO] + Gross Interest (Paid) - Interest Received + Preferred Dividends (Paid) + Operating Lease Expense for Capitalised Leased Assets.

FFO Fixed Charge Cover: FFO + Gross Interest paid minus interest received + Preferred Dividends paid + Operating Lease Expense for Capitalised Leased Assets divided by Gross Interest Paid + Preferred Dividends Paid + Operating Lease Expense for Capitalised Leased Assets.

Key Assumptions

Fitch's key assumptions within our rating case for the issuer include:

- revenue growth of 2% in 2017, accelerating in 2018 and 2019 underpinned by new contracts and some organic growth;
- EBITDA margin remaining steady at between 13.5% and 14.0%;
- rental expenses lower as a result of leases associated with expiring contracts;
- minority profits fully paid out fully as dividends: EUR39 million in 2017, EUR44 million in 2018;
- capex higher in 2017 and 2018 due to contract renewals and investments in new contracts which we assume will be partially funded by debt drawdowns;
- we forecast capex falling back towards about EUR45 million-50 million per annum from 2019;
- no common dividends.

How to Interpret the Forecast Presented

The forecast presented is based on the agency's internally produced, conservative rating case forecast. It does not represent the forecast of the rated issuer. The forecast set out above is only one component used by Fitch to assign a rating or determine a rating outlook, and the information in the forecast reflects material but not exhaustive elements of Fitch's rating assumptions for the issuer's financial performance. As such, it cannot be used to establish a rating, and it should not be relied on for that purpose. Fitch's forecasts are constructed using a proprietary internal forecasting tool, which employs Fitch's own assumptions on operating and financial performance that may not reflect the assumptions that you would make. Fitch's own definitions of financial terms such as EBITDA, debt or free cash flow may differ from your own such definitions. Fitch may be granted access, from time to time, to confidential information on certain elements of the issuer's forward planning. Certain elements of such information may be omitted from this forecast, even where they are included in Fitch's own internal deliberations, where Fitch, at its sole discretion, considers the data may be potentially sensitive in a commercial, legal or regulatory context. The forecast (as with the entirety of this report) is produced strictly subject to the disclaimers set out at the end of this report. Fitch may update the forecast in future reports but assumes no responsibility to do so.

Operating Environment

bb+	Economic Environment	bb	Below average combination of countries where economic value is created and where assets are located.
bb	Financial Access	bb	Below average combination of issuer specific funding characteristics and of the strength of the relevant local financial market.
	Systemic Governance	b	Systemic governance (eg rule of law, corruption; government effectiveness) of the issuer's country of incorporation consistent with 'b'.
b-			
ccc			

Competitive Environment

bb	Barriers to Entry	b	Exposure to markets easily susceptible to new competition. High likelihood that new entrants could emerge.
bb-	Supply/Demand	bb	Exposure to markets that have modest gaming supply growth prospects, which can be absorbed by stable growth in demand.
b+	Promotional Environment	b	Exposure to markets susceptible to aggressive promotional activity that drives competitive responses or revenue share losses.
b	Gaming Regulatory Environment	bb	Exposure to jurisdictions that have short or volatile histories of regulating gaming and tax regimes.
b-			

Company's Market Position

bbb	Market Share	bb	Predominantly second-tier player in most markets.
bbb-	Competitive Advantage; Brand Recognition	bb	Never or brand building and loyalty programs, not sophisticated/established. Supported by regular property improvement programs.
bb+	Property Quality	n.a.	
bb	Market Exposure/Opportunities; Multi-Channel Offerings	bbb	Attractive opportunities in underserved markets or new distribution channels (eg online) and/or strong position in stable markets.
bb-			

Profitability

bb-	FFO Margin	b	7%
b+	EBIT Margin	ccc	Persistently and structurally break-even or loss-making at EBIT level.
b	FCF Margin	b	Neutral to negative FCF margin.
b-	Volatility of Profitability	bb	Volatility of profits in line with industry average.
ccc	EBITDAR Margin	b	10%

Financial Flexibility

bbb-	Financial Discipline	bb	Expressed commitment to maintain a conservative policy with some deviations allowed.
bb+	Liquidity	bb	Liquidity ratio around 1.0x. Less smooth debt maturity or concentrated funding.
bb	FFO Fixed Charge Cover	b	2.0x
bb-	FX Exposure	bb	FX exposure on profitability and/or debt/cash flow match. Some hedging in place but only partly effective.
b+			

Management and Corporate Governance

bbb-	Management Strategy	b	Strategy lacking cohesion and/or some weakness in implementation.
bb+	Corporate Governance	bb	Board effectiveness questionable with few independent directors. "Key man" risk from dominant CEO or shareholder.
bb	Group Structure	bb	Complex group structure. Related-party transactions exist but with reasonable economic rationale.
bb-	Financial Transparency	bb	Financial reporting is appropriate but with some failings (eg lack of interim or segment analysis).
b+			

Capex Pipeline & Investment Strategy

bb+	Scale	b	Existing and potential pipeline is heavy relative to a weak discretionary FCF profile and weak liquidity profile.
bb	Funding	bb	Project/development spending funding is likely to skew materially toward debt relative to equity and/or existing cash flow.
bb-	Prospects	bb	Projects have reasonable ROIC prospects and/or some diversification benefits.
b+			
b			

Diversification

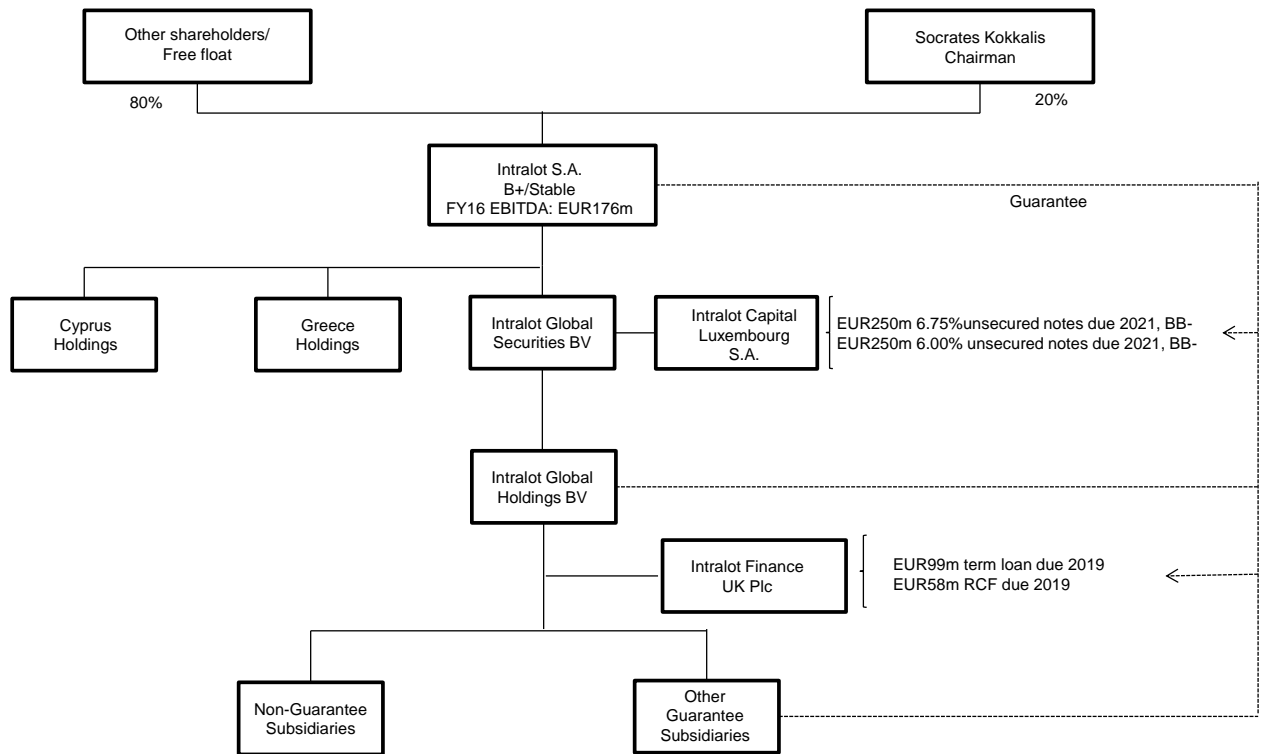

bbb-	Geographic	bbb	Exposure to several markets and several jurisdictions, potentially including international exposure.
bb+	Property/Locations	n.a.	
bb	Business and Customer Segment	b	Narrow focus on primarily gaming-related activities.
bb-			
b+			

Financial Structure

bb	Lease Adjusted FFO Gross Leverage	b	6.0x
bb-	Lease Adjusted FFO Net Leverage	b	5.5x
b+	Net Debt/(CFO - Capex)	ccc	8.0x+
b	Adj. Gross Debt/(EBITDAR-Minority)	bb	5.0x

B+/B/B-/CCC Table

Considerations	B+	B	B-	CCC	Trend	Fitch's View
Business Model	Robust	Sustainable	Intact	Compromised	◀▶	86% of Intralot's revenue is contracted until 2020, while a large proportion of EBITDA is also visible. Intralot is smaller than Ladbrokes Coral, William Hill, IGT and Scientific Games. However, it has broad geographic diversification and benefits from the more profitable emerging markets. It also has an established position in the US, and is well placed for potential growth opportunities.
Strategy/ Execution Risk	Limited	Moderate execution risk	Meaningful execution risk	High execution risk	◀▶	Execution risk is moderate due to the timing of the Oceania transaction. For all other matters we view strategy as reasonable with limited execution risk.
Cash Flow	Consistently Positive	Neutral to positive FCF	Volatile FCF	Constantly negative FCF	◀▶	We expect FCF to be negative in 2017/2018 bottoming at -1.8% in 2018 due to one-off investments and some renewal fees and then to turn positive thereafter. FCF can be volatile as a result of upfront investments related to new contracts of contract renewals; however this does contribute to a steady operating cash-flow generation due to its recurring profit stream as a key credit support.
Leverage Profile	Clear deleveraging path	Deleveraging capacity	High but sustainable	Unsustainable	◀▶	Fitch expects FFO adjusted gross leverage to remain high at 6.1x in FY17, rising to 6.5x in FY18 due to expected issuance for the Illinois contract. Such leverage is not commensurate with a 'B+' rating, and there is no headroom under the sensitivity guidance. However, we expect that the group would have to ability to reduce the gross leverage in light of the high cash balance, to be seen from FY19. This is demonstrated by FFO adjusted net leverage metrics that are in line with the current rating.
Governance and Financial Policy	Committed	Some commitment to deleveraging	Aggressive	Uncommitted/biased towards equity interests	◀▶	Intralot reduced total gross debt by about EUR140 million in 2016; evidence of some commitment to deleveraging.
Refinancing Risk	Limited	Manageable	High	Excessive	◀▶	Intralot managed to reduce total gross debt during FY16 through refinancing and using cash to repay. This transaction (referred to above) pushed the maturities out until FY21 while the credit facilities mature in 2019. Cash flows can be somewhat volatile due to lumpy capex, although we expect the group to be able to refinance in future years.
Liquidity	Comfortable	Satisfactory	Limited	Poor/partly funded	◀▶	Intralot had EUR164 million of cash on the balance sheet at FYE16, of which about 7% is deposited in Greek banks; and around EUR65 million of undrawn availability under committed facilities, which was sufficient for liquidity purposes with no significant debt maturity until 2019. During the start of FY17, Intralot drew EUR15 million under its RCF with respect to the new Amelco partnership.
CONCLUSION	B+

Reproduction or retransmission in whole or in part is prohibited except by permission. All rights reserved. In issuing and maintaining its ratings and in making other reports (including forecast information), Fitch relies on factual information it receives from issuers and underwriters and from other sources Fitch believes to be credible. Fitch conducts a reasonable investigation of the factual information relied upon by it in accordance with its ratings methodology, and obtains reasonable verification of that information from independent sources, to the extent such sources are available for a given security or in a given jurisdiction. The manner of Fitch's factual investigation and the scope of the third-party verification it obtains will vary depending on the nature of the rated security and its issuer, the requirements and practices in the jurisdiction in which the rated security is offered and sold and/or the issuer is located, the availability and nature of relevant public information, access to the management of the issuer and its advisers, the availability of pre-existing third-party verifications such as audit reports, agreed-upon procedures letters, appraisals, actuarial reports, engineering reports, legal opinions and other reports provided by third parties, the availability of independent and competent third-party verification sources with respect to the particular security or in the particular jurisdiction of the issuer, and a variety of other factors. Users of Fitch's ratings and reports should understand that neither an enhanced factual investigation nor any third-party verification can ensure that all of the information Fitch relies on in connection with a rating or a report will be accurate and complete. Ultimately, the issuer and its advisers are responsible for the accuracy of the information they provide to Fitch and to the market in offering documents and other reports. In issuing its ratings and its reports, Fitch must rely on the work of experts, including independent auditors with respect to financial statements and attorneys with respect to legal and tax matters. Further, ratings and forecasts of financial and other information are inherently forward-looking and embody assumptions and predictions about future events that by their nature cannot be verified as facts. As a result, despite any verification of current facts, ratings and forecasts can be affected by future events or conditions that were not anticipated at the time a rating or forecast was issued or affirmed.

The information in this report is provided "as is" without any representation or warranty of any kind. A Fitch rating is an opinion as to the creditworthiness of a security. This opinion is based on established criteria and methodologies that Fitch is continuously evaluating and updating. Therefore, ratings are the collective work product of Fitch and no individual, or group of individuals, is solely responsible for a rating. The rating does not address the risk of loss due to risks other than credit risk, unless such risk is specifically mentioned. Fitch is not engaged in the offer or sale of any security. All Fitch reports have shared authorship. Individuals identified in a Fitch report were involved in, but are not solely responsible for, the opinions stated therein. The individuals are named for contact purposes only. A report providing a Fitch rating is neither a prospectus nor a substitute for the information assembled, verified and presented to investors by the issuer and its agents in connection with the sale of the securities. Ratings may be changed or withdrawn at anytime for any reason in the sole discretion of Fitch. Fitch does not provide investment advice of any sort. Ratings are not a recommendation to buy, sell, or hold any security. Ratings do not comment on the adequacy of market price, the suitability of any security for a particular investor, or the tax-exempt nature or taxability of payments made in respect to any security. Fitch receives fees from issuers, insurers, guarantors, other obligors, and underwriters for rating securities. Such fees generally vary from US\$1,000 to US\$750,000 (or the applicable currency equivalent) per issue. In certain cases, Fitch will rate all or a number of issues issued by a particular issuer, or insured or guaranteed by a particular insurer or guarantor, for a single annual fee. Such fees are expected to vary from US\$10,000 to US\$1,500,000 (or the applicable currency equivalent). The assignment, publication, or dissemination of a rating by Fitch shall not constitute a consent by Fitch to use its name as an expert in connection with any registration statement filed under the United States securities laws, the Financial Services and Markets Act 2000 of the United Kingdom, or the securities laws of any particular jurisdiction. Due to the relative efficiency of electronic publishing and distribution, Fitch research may be available to electronic subscribers up to three days earlier than to print subscribers.

For Australia, New Zealand, Taiwan and South Korea only: Fitch Australia Pty Ltd holds an Australian financial services license (AFS license no. 337123) which authorizes it to provide credit ratings to wholesale clients only. Credit ratings information published by Fitch is not intended to be used by persons who are retail clients within the meaning of the Corporations Act 2001.
