INTRALOT showcases its portfolio of next-generation technology solutions from Europe to North America

INTRALOT, as a leading gaming vendor and operator in the state-sponsored gaming industry, proudly presents its latest innovations; the future-proof and fully parametrical lottery platform, Lotos X, and the future-rich and versatile sports betting platform, INTRALOT Orion.

INTRALOT Booth, EL Congress 2019 in Antwerp

INTRALOT's ecosystem of true omnichannel lottery and sports betting solutions meets both the players' and operators' modern needs by offering the platforms, tools and gaming content to deliver entertaining and responsible gaming experiences. INTRALOT, true to its heritage of innovation, embraces industry evolution and persistently adopts emerging technologies to best address the ever-changing needs of consumers, and maintain its leadership position in the gaming industry.

To meet players' growing demand for rich lottery gaming content, INTRALOT has developed a new lottery solution that enables operators to offer any game in a secure and time-efficient manner.

At the heart of INTRALOT's lottery solution lies Lotos X, the most parametrical games and draw management platform in the industry.

Lotos X enables lottery operators to deliver their entire gaming offering, as well as their planned portfolio expansion, with minimum time-to-market, while offering an unprecedented simplification of their daily operations.

Leveraging more than 25 years of sports betting operations experience proven in 29 operations globally, INTRALOT has developed INTRALOT Orion, a world-class sports betting platform designed to support modern sports betting operations.

INTRALOT Orion, a holistic sports betting solution, incorporates managed trading services and a wide portfolio of retailer and self-service terminals, tailored to the needs of each sports betting operation.

The INTRALOT Orion platform serves the entire bet lifecycle across channels with a rich set of functionalities for margin enhancement and features for increased player participation (cash-out, bonusing, personalized odds, etc.).

“INTRALOT, based on its strategic approach ‘The Intelligent Future of Gaming’, has invested extensively in the development of next-generation gaming products and services designed to meet all digital transformation needs for lotteries, revealing INTRALOT’s comprehensive digital transformation strategy in a multiconnected world. Our company is more committed than ever to providing innovative and holistic solutions for the most dynamic player experiences to support lotteries’ journey to their digital future, help drive our customers’ growth, and generate revenues for good causes.”

– Nikos Nikolakopoulos, INTRALOT Group Deputy CEO
