Key Features

Low profile and ergonomic design

microLOT's low-profile construction allows it to fit and easily be accessible in very tight countertops.

Integrated barcode reader

The front-facing barcode reader is capable of scanning any 1D and 2D barcodes, as well as QR codes.

High-performance printer

The terminal's embedded printer meets high-volume printing demands with speed and convenience. It allows for easy 'drop and go' roll loading and includes an automatic cutter for lottery-sized paper.

Powerful and reliable processor

microLOT accommodates an exceptional multi-core processing unit based on the highly efficient, low-power consumption ARM platform. With any addition from a range of external compact scanners, it delivers a top-performing full-service solution.

Fan-less and dust-proof

The terminal's unique design provides adequate airflow without using an internal fan and prevents dust and moisture from accumulating internally.

Multiple connectivity options

Wired and wireless connectivity options offer great expandability with any peripheral on demand.

Retail Solution Peripherals

SCANNER | CUSTOMER DISPLAY | GENION / TICKET CHECKER | BCR (EXTERNAL) | CASH DRAWER
